

HYDRAULIC CYLINDERS · POWER PACKS · VALVES

Neumeister
Hydraulik

**MADE IN
GERMANY**

Professional solutions for premium products.

>90 JAHRE
IN BEWEGUNG

More than 90 years in motion. Looking at the development of Neumeister Hydraulik, this is literally true.

Pioneering spirit, inventiveness and a keen eye for needs of the market have kept Neumeister Hydraulik moving since it was founded in 1929 by Otto Neumeister. There was never stagnancy – the company always aligned to the most diverse challenges.

Innovative products for new markets allowed the company to grow – just as well Neumeister has mastered external circumstances, that will always exist in our time.

Neumeister Hydraulik located in Neuenstadt am Kocher currently employs around 300 people.

On 16,700 m² modern offices and production departments offer a pleasant working environment for the technically skilled, experienced and often longtime employees. Neumeister values every single employee and is aware of its responsibility as an employer.

The ample production surfaces of Neumeister are located easily accessible close to the exit Neuenstadt of highway A81.

As a medium-sized company – and Hidden Champion in the area - Neumeister is committed to pave young people their way into working life and educates its junior staff (on average 20 apprentices) on site – in the „Lehr- und Ausbildungsstätten“ which was founded in 1996.

Neumeister Hydraulik. Ample production surfaces, easily accessible.

Junior staff is educated in the in-house training centre.

PORTFOLIO

We develop and produce hydraulic cylinders with all corresponding components such as power packs, controls and valves for various applications in the mobile and stationary sector. Our development department provides solutions that set impulses in the market and offer our customers added functionality and safety. Neumeister Hydraulik considers itself a provider of complete solutions for the hydraulic requirements of its mostly longstanding customers.

Inspiring motto:
Professional solutions for premium products!

Neumeister can exploit the experience and vast knowledge gained over decades and thus has always set impulses for new developments. This still spurs the hydraulic experts on today to achieve top performances – no matter whether a new cylinder is designed or established products are modified or upgraded.

INDIVIDUAL, INNOVATIVE

Development / Engineering / Materials research / Production / Logistics / Service / Support. We do not offer anything off the shelf. In close cooperation with our customers we find solutions for their requirements – as particular or exotic they may be. For the benefit of our customers, our team contributes long-time experience from thousands of applications for every new product solution – right from the beginning of a new project.

CYLINDERS, MOBILE OR STATIONARY

For Neumeister as a hydraulics specialist, the development of special cylinders has been a „genetic programme“ for more than 90 years, constant innovation meets the claim ‚Made in Germany‘: special customer requests are inspiring incentive!

SINGLE-ACTING CYLINDERS The Neumeister Hydraulik product range comprises single-acting cylinders from piston Ø 16 - 650 mm, stroke up to 7.200 mm being used, for example, as axle compensation cylinders in heavy-duty vehicles or lifting cylinders for heavy loads.

DOUBLE-ACTING CYLINDERS of the large cylinder range serve for example as actuation cylinders in hydraulic steelwork. The largest double-acting cylinder of our range has a stroke of 10.000 mm.

SPECIAL CYLINDERS - indispensable for the logistics and construction industry. Luffing cylinders allow accurate work and best manoeuvrability of a crane in case of challenging space requirements.

TELESCOPIC CYLINDERS with 4 to 9 stages or front lifting cylinders with 3 to 6 stages?

The reliable Neumeister products convince in construction industry and agriculture or on the apron. Before shipment, all telescopic cylinders pass a certified test programme.

TELESCOPIC CYLINDERS out of a comprehensive range, from 4 to 9 stages and tipping weight of 6 – 40 tons. Used as tipping cylinder in a 3-side tipper or scissor lifting cylinders in ground support equipment (GSE).

FRONT LIFTING CYLINDERS Telescopic cylinders with 3 to 6 stages and strokes up to 10.000 mm. Front lifting cylinders for construction site tippers as well as silo trucks.

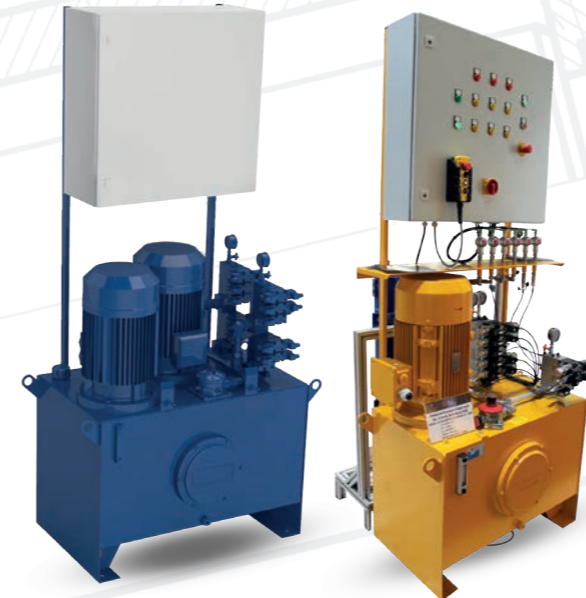

POWER PACKS / ELECTRONICS / VALVES

Neumeister Hydraulik offers complete system solutions: Cylinders, power packs, controls, valves – all from a single source. Where other manufacturer's standard valves end, Neumeister Hydraulik's valves are just beginning!

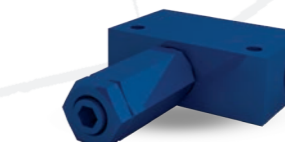

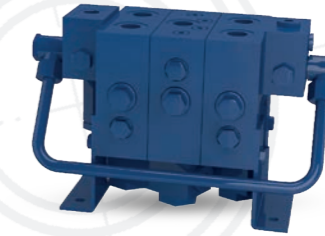

POWER PACKS / ELECTRONICS The various hydraulic systems and compact power packs, electrical components and individual control and operating units are tailor-made solutions according to customer requirements and technically aligned to the respective application purposes. Here focus is always laid on functional reliability, easy handling and efficiency. The advantage for the customers: ready-to-use and function-tested complete systems.

A proven modular system and a large stock capacity guarantee short delivery times - even for custom-made products!

VALVES Various kinds of directional control valves, pressure control valves, flow control valves, safety valves: these complimentary hydraulic components enhance efficiency and longevity of the cylinders and power packs manufactured by Neumeister Hydraulik. High-quality materials and their processing guarantee protection against possible environmental damage!

Perfect completion to the extensive range of cylinders: Hydraulic double check valves / stream-controlled flow dividers / tipping valves / pressure control valves / hose rupture valves.

LATEST MACHINERY PAIRED WITH EXPERTISE AND SKILLS

Latest fully automatic welding robots are joined by computer-controlled NC lathes.

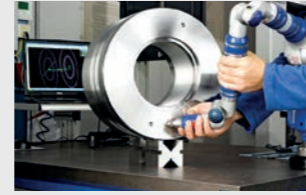

In addition, the Neuenstadt based hydraulics specialist still does a lot of manual work in the final assembly to meet the demand for flawless products.

The design department, on the other hand, entirely relies on computer support. Specially trained designers work with latest CAD programmes and so assess from the very beginning how the developed cylinders will prove in daily use.

Thanks to the tight organization and the optimized in-house production processes, Neumeister is able to always meet the requirements in terms of on-time delivery and quality.

Top products and top service are the standards we set for ourselves. Therefore we develop and manufacture our entire product range in Neuenstadt.

On our website you will find our complete product catalogue for all hydraulic products and components with the corresponding technical data for download.

We are experts and develop the perfect hydraulic product for each of our customers' individual requirement, either tailor-made or based on our comprehensive product range.

Online tools: Via a link on the homepage the interactive product configuration for standard double-acting cylinders allows easy access to a validated modular system with all product information and design data as well as the matching 3D geometry.

For Neumeister the quality seal „Developed and Made in Germany“ is a quality promise for our customers. Today and in future. We have been certified since 1996.

MASTERING CHALLENGES. SECURING THE FUTURE.

The corporate philosophy - quality and ideas - constantly presents Neumeister Hydraulik with new challenges which are being mastered as a team. Networking, exchange, inspiration.

The proximity to our core market Europe allows us to pursue new developments in close cooperation with our customers and timely

adapt our product range to the growing and changing market requirements.

The management has set the company course for the future. With modern machining centres which enable complete processing of

individual components production processes are further optimized and efficiency. Stagnation is regression.

The demands of dynamic markets set the course for new challenges.

Neumeister Hydraulik. A brand that thinks ahead.

We take up every challenge.

Professional solutions for premium products.
